

Western Springs Recreation Center

VILLAGE OF WESTERN SPRINGS

LOCATION

Western Springs, Illinois

PROJECT DELIVERY

General Contracting

ARCHITECT

FGM Architects
(Formerly SRBL Architects)

This first of three successful projects for the Village of Western Springs involved construction of a new, 28,500 SF Recreation Center. Subsequently, ICI was contracted by the Village to complete the redevelopment of Spring Rock Park and an addition to the Public Works facility.

This 2-story structure houses 19,150 SF of gymnasium facilities, administrative offices, mechanical and electrical spaces, restrooms and lockers on its lower level.

The 9,350 SF second floor incorporates additional classrooms and restrooms as well as multi-purpose rooms.

The facility was completed within the established budget and schedule.
