

Fiat Dealership FIELDS AUTO GROUP

LOCATION

Highland Park, Illinois

PROJECT DELIVERY

Construction Management

ARCHITECT

JRB Group Architects

Chrysler Corporation brought FIAT back into the United States for the first time in 25 years and Fields Motorcars opened the first dealership in Illinois.

In coordination with construction completed on a new Fields Volvo Dealership in Northfield, IL, the new FIAT dealership moved into an existing location in Highland Park, previously occupied by Volvo. ICI's ability to develop and effectively coordinate the schedules of these two projects was crucial in allowing for a smooth transition.

The scope of work for the fast-track FIAT project included complete demolition of

the façade storefront, interior finishes and existing signage, immediately after the Client's transition from the space.

Complete renovation of the showroom and other sales / customer areas took place within a non-stop, eight (8) week, schedule. To ensure a quick transformation, ICI coordinated with Fields Motorcars and JRB Group architects during preconstruction to identify, coordinate, and place orders for FIAT approved materials.
