

BMW Dealership FIELDS AUTO GROUP

LOCATION

Lakeland, Florida

PROJECT DELIVERY

Construction Management

ARCHITECT

JRB Group Architects

Fields Auto Group purchased an existing building and a vacant parcel of land adjacent the property. The dealership owners turned to ICI to renovate the existing building, expand onto the western edge of the building and also construct a stand alone building on the edge of the property. Additionally, ICI added 140 new parking space and placed associated site utilities - landscape, paving and curbs.

Within the addition, ICI constructed an service center with eight bays and added and new tool room, parts room elevator, training center and an expansion of a 2-level parts storage area.

The separate new building is an automatic car wash and a new 4-bay prep center. Lastly, within the existing building, ICI remodeled the general offices and expanded the service manager's office area.
