Identity Architects

In June 2013, ICI was selected as the general contractor for Oak Brook Shopping Center's newest upscale restaurant, Perry's Steakhouse & Grille. The new high-end steakhouse occupies the ground level of the Neiman Marcus building on the south side of mall.

The 11,000 square foot space houses both open and private dining, an expansive curvilinear bar and adjacent lounge, an impressive wine and liquor storage area, an outdoor patio, as well as a large smoker for preparing their house specialties.

A fast-track project schedule was required in order for the restaurant to be complete in time for the approaching

holiday season at Oak Brook Shopping Center. The project opened on time and the restaurant immediately received a warm reception among the Chicago dining scene.

ICI was selected from among a prequalified group of general contractors to construct the restaurant group's first location outside of Texas.

The concept began more than 30 years ago as a modest meat market and today has grown to a premier steakhouse; Oak Brook marks their tenth location.
